

*Winter Survival Products  
Keep your Skin looking its Best  
Throughout the Winter of 2023!*

*Save 20% through February....*

As the weather continues to be cold and harsh, winter marks the most challenging time of year for skincare users. Your skin might be feeling it already.

To fight deeper wrinkles, clammy or dull texture, and dry patches, it's more important than ever to keep skin hydrated, nourished, and protected.

We recommend these products to help keep your skin looking beautiful through the dry months ahead, both on their own and as a combined, complete winter regimen.

**CLEANSE: CHAMOMILE FACIAL CLEANSER**

Begin with a hydrating cleanser. We recommend our [Chamomile Facial Cleanser](#), which contains deeply moisturizing red algae peptides. It also soothes and softens with vitamin B3 and ginger and chamomile essential oils.

Did you know that pollution particulate matter levels are higher indoors than outdoors? With greater time spent indoors, this season is particularly important to cleanse and protect against pollution. Besides hydrating, Chamomile Facial Cleanser also penetrates and purifies pores, eliminating pollution of size PM0.1 or greater, helping patients keep their skin clear, smooth, and radiant.

**TREAT: ULTRA BENEFITS**

Follow your cleansing with our [Ultra Benefits](#) which is an antioxidant moisturizer combining the strongest antioxidant Lipohroman to help reverse and prevent visible aging change. Peptides and brighteners visibly improve appearance of lines, wrinkles and age spots.

**ENHANCER: TIGHTENING EYE GEL**

As patients want to continue into 2023 looking their best, we recommend doing so with an eye product to eliminate lines, wrinkles, crow's feet, and dark patches. The [Ultra Benefits Eye Gel](#) protects and heals the eye area, improving capillary drainage and reduces dark patches and bags using Lipochroman® and Chromabright®, an advanced fade ingredient that greatly reduces hyperpigmentation.
